

# Torq Control®

Universal  
Torque Wrench

**Torq Control®** is the Anthogyr universal torque wrench offering the guarantee of tightening precision, whatever the type of implant connection or the difficulties of access.

Precise tightening is a key factor to secure implant treatment success. **Torq Control®** has been specially designed by Anthogyr to meet these requirements for all prosthetic manipulations, in all safety thanks to automatic declutching. **A must-have, especially for full-arch restorations.**

### ADAPTED FOR ALL PROTOCOLS

7 torque values

### AUTOMATIC DECLUTCHING

Precision  
+ Safety

### MANUAL INSTRUMENT

Screw-in feel for full control

### 100° MICRO-HEAD

Posterior sector easy access  
+ Excellent visibility

### UNIVERSAL CONNECTION

All prosthetic mandrels  
Any implant system

### ERGONOMIC DESIGN

Patient comfort  
Ease of use - 130 g only

An iconic product since 1997!

## COMPATIBLE WITH ALL IMPLANT SYSTEMS!

- Universal connection for all dental implant systems
- 7 torque values, from 10 to 35 N.cm, adapted for all protocols

## DESIGNED FOR EFFICIENCY

- Micro-head, 100° angulated for easy access and optimal visibility, even in posterior sectors

## MAXIMUM COMFORT OF USE

- Manipulation 100% outside of mouth
- No lateral movement

“ I’ve been using Torq Control® for 5 years now. Its precision, flexibility and easy handling makes this device a must in my prosthetic dental implant practice nowadays. Easy to handle and adjust the correct intensity, it makes me feel on the safe side, knowing the amount of Newton’s required for each screw and abutment is the correct one. The small head allows to reach any sector. Compatible with all dental implant systems on the market, it gives me more versatility and option to choose no matter which restoration is to be placed. Small, powerful, and easy handlings are the best features of this device. For me, it is a must in every office. I’m totally hooked with my Anthogyr Torq Control® device.”

## SO EASY TO HANDLE

- Only 130 g for a better freedom of movement

Packaging service, Anthogyr Sallanches

## EASY MAINTENANCE

- One-piece design
- Sterilizable in autoclave, 135°

## PERFECT PRECISION IN ALL SAFETY

- High precision torque tightening
- Automatic declutching when the selected torque is reached

“Anthogyr’s Torq Control® has been part of my toolkit for implant supported prosthetic restorations for several years. I use it at the end of the operations when I decide to install the multi-unit abutments or InLink® abutments to support multiple-prosthesis with the correct tightening; I use it to check the integration of the implants and above all to tighten all the prosthetic connection screws.”

## GUARANTEE OF QUALITY

- Made in the Mont-Blanc Valley, France, since 1997
- High quality manufacturing

Compared to the usual torque wrenches, Torq Control® allows an absolutely precise tightening value with any implant system and is also very convenient for disassembling and reassembling those complex rehabilitations such as the Toronto-bridges for periodic hygienic sessions. Both in the office and in the laboratory, this is a fundamental tool! ”
